The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status

#### **DETAILED ACTION**

### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/13/06 has been entered.

### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 23, 26, and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 23, the word "means" is preceded by the word(s) "having a length," in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967). The applicant is advised to move the recitation "for releasably securing the prosthesis to the distal end" to immediately follow the means.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 12, 14, 23, 27, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,653,748 Strecker.

In regards to claims 1-4, 12, and 14 Strecker discloses the same invention being a prosthetic delivery device comprising a flexible elongated member (11), a means for releasably securing the prosthesis comprising a crocheted material (14) including a thread having a plurality of loops, and a visual marker (20 the final loop) attached to the prosthesis, visible by the operator.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8-11, 13, 26, and 33 are rejected under 35 U.S.C. 103 as being unpatentable over United States Patent 5,653,748 Strecker in view of United States Patent 5,480,423 Ravenscroft.

Application/Control Number: 10/696,845

Art Unit: 3738

Strecker discloses the invention substantially as claimed being a prosthetic delivery device. However, Strecker does not disclose that his prosthetic is a selfexpanding stent that expands to a larger radius and a shorter length or that the marker is positioned in order to show the shortened length of the stent after implantation.

Ravenscroft teaches the use of a prosthetic delivery device comprising a length shortening self-expanding stent and marker bands in the same field of endeavor for the purpose of providing a concentrated expansion force within a body lumen, wherein the operator has full knowledge of the location of the stent beginning and end in both the expanded and contracted phases shown best in figures 2a – 2f.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the stent and markings of Ravenscroft with the delivery device of Strecker in order to provide a concentrated expansion force within a body lumen, which can be accurately tracked by the operator throughout the insertion process.

# Response to Arguments

Applicant's arguments filed 11/13/06 have been fully considered but they are not persuasive. Applicant argues that neither Strecker nor Ravenscroft disclose a distinct visual marker element. However the applicant specifically recites in paragraph [0033] how broadly the marker can be interpreted.

"The visual marker of the present invention can be broadly defined as any characteristic or feature included in the apparatus 21, whether on the prosthesis Application/Control Number: 10/696,845 Page 5

Art Unit: 3738

22, device 26 and/or elsewhere on the apparatus 21, which can be observed under direct visualization so as to facilitate placement of the stent or other prosthesis within the mammalian body."

The end mesh loop of Strecker can clearly be considered a marker and used to help position the stent. Furthermore the end crocheted loops is clearly visually distinct.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher D. Prone whose telephone number is (571) 272-6085. The examiner can normally be reached on Monday Through Fri 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
